

HYDRODUCT 200

Design Description

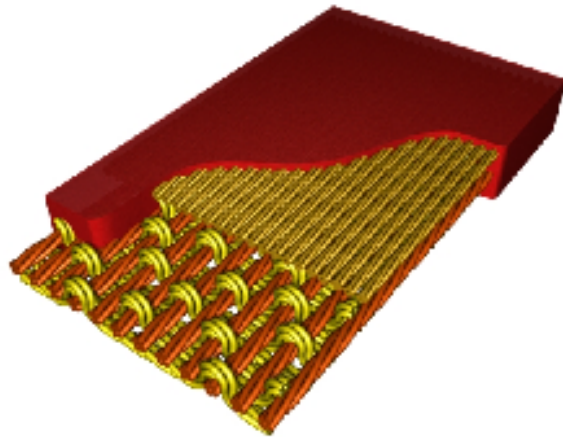

HYDRODUCT 200 is a two layer advanced material press fabric with MD oriented yarn system in the top ply. The base ply is an integrally woven single layer fabric. This unique combination provides excellent nip dewatering, fast start-up and sheet smoothness.

Features

- 100% MD oriented top ply
- Excellent void volume base ply
- Laminated advanced material construction
- Excellent fabric uniformity

Benefits

- Extremely quick break-in
- Excellent sheet finish
- Increased dewatering potential
- Compaction resistant for extended life
- Vibration free performance
